4' Bench with Center Arm Rest

4' Bench without Center Arm Rest

4' Green Brook Backless Park Bench

The Green Practical three words that best describe this Backless Park Bench are: it is a steel frame that is made from recycled plastic with a powder coated finish. The seat slats are made from recycled plastic with a weather resistant finish. The seat slats are 1 1/2" thick and come in several colors. See below.

- Seat height 18-1/2", Arm rest height is 26"
- 100% recycled plastic slats, 2 1/2" thick x 3 1/2" wide
- Slats available in eleven colors (See below)
- Frame is 1" Sch. 40 pipe legs are 3" square with flanges pre-drilled for anchoring. In-ground mounting is also available. The frame is available in six standard colors (See Page 2)
- Available in 4-foot without center arm rest or 6-foot with center arm rest.
- Fully assembled
- Pre-drilled mounting holes in feet, (Anchoring hardware included)
- Our durable Super TGIC powder coat paint Zinc Advantage system (See Page 2 for Paint details).
- Mounted on skids to insure trouble-free shipping

Available Recycled Plastic Slat Colors:

Bronze (C33)

Silver Gray (70049)

Green (RAL 6005)

Blue (RAL 5012)

Burgundy (RAL 3004)

Color Matching Information: OCCOutdoors makes every effort to present the planter colors as accurately as possible. The planter colors have been produced electronically and are provided for general color information and illustration purposes only. Because of the differences in computer monitors, printers, other hardware and software combinations, the depicted results are intended to be used as approximations of color and not as definitive representations and should not be relied upon or used as such. We cannot guarantee you will achieve desired results without verifying an actual color sample of your actual color selection. For specific advice regarding your project, we recommend that you contact OCC Outdoors: Phone: 1-800-821-7670 email: occcontact@occoutdoors.com

Zinc Advantage Process Details:

Zinc rich primer & Super TGIC powder coat Finishing operations.

1. Sand blasts each unit down to shiny metal.
2. Clean and hand inspects each unit.
3. Powder coat with 70 % zinc rich epoxy resin primer.
4. Partially bake the primer.
5. Powder coat with SUPER TGIC Polyester finish coat.
6. Final bake, creating a molecular bond between the steel, primer and finish coat.
7. Each part is tested by a Xylene test to insure a complete cure.

Advantages:

1. A very tough durable finish with 5 times the fade resistance of standard TGIC powder coatings with a 3H pencil hardness. (All test conducted in South Florida.)
2. If scratched through to the metal, the zinc rich primer greatly reduce rust and the potential for the migration of rust.
3. This system is cured and each unit test for cure so many types of paint used for graffiti can be clean with mild solvents.

Our paint manufacturer's Zinc Rich Primer TGIC Polyester out lasts all major competitors on the 4000 hour salt spray test per ASTM B117. Detailed reports available by request.
