

36-Gallon Square Ash & Trash Receptacle

Square Ornamental vertical slatted 36-gallon heavy duty steel slatted ash & trash receptacle with side access door has the with a classy design and one of the best paint systems on the market and options that makes the receptacle not only functional but attractive. The first thing to get damaged on any trash receptacle is the top around the trash opening. Our recycled plastic top resist scratching and scuffing and will never rust. Lockable Side Access Receptacles are great for every environment, office, school, church or Main Street. Commercial Lockable Side Access Receptacles come in several designs, capacities, and colors with options like rain guard and side excess.

Green (RAL 6005)	Blue (RAL 5012)
Silver Gray (70049)	Burgundy (RAL 3004)

Zinc Advantage Process Details:

Zinc rich primer & Super TGIC powder coat Finishing operations.

1. Sand blasts each unit down to shiny metal.
2. Clean and hand inspects each unit.
3. Powder coat with 70 % zinc rich epoxy resin primer.
4. Partially bake the primer.
5. Powder coat with SUPER TGIC Polyester finish coat.
6. Final bake, creating a molecular bond between the steel, primer and finish coat.
7. Each part is tested by a Xylene test to insure a complete cure.

Advantages:

1. A very tough durable finish with 5 times the fade resistance of standard TGIC powder coatings with a 3H pencil hardness. (All test conducted in South Florida.)
2. If scratched through to the metal, the zinc rich primer greatly reduce rust and the potential for the migration of rust.
3. This system is cured and each unit test for cure so many types of paint used for graffiti can be clean with mild solvents.

Our paint manufacturer's Zinc Rich Primer TGIC Polyester out lasts all major competitors on the 4000 hour salt spray test per ASTM B117. Detailed reports available by request.
